

# Compounding Pharmacies

## Comprehensive Solutions for Compounding Pharmacies

Ensure your compounding operations remain safe, compliant, and reliable with a full suite of laboratory testing and environmental monitoring services designed specifically for compounding pharmacies. Innovotech is a proudly Canadian, GMP-accredited laboratory with over 20 years of experience, offering comprehensive testing solutions to support compliance with USP <797>, USP <800>, the National Association of Pharmacy Regulatory Authorities (NAPRA), and Health Canada.

A regular monitoring program is a key component of a strong quality system. Our services help you maintain effective control over personnel, facilities, and equipment while identifying microbial risks early—allowing you to take timely action and safeguard the integrity of your operations.

### Our Comprehensive Testing Services Include:

- **Operator Qualification** - Glove fingertip & media fill testing to demonstrate ongoing aseptic technique competency.  
(USP <797> 2.2 | 2.3 | NAPRA 7.4)
- **Sterility Testing** - Verification that compounded sterile preparations are free from microbial contamination.  
(USP <797> 12.2 | NAPRA 6.1.3)
- **Endotoxin Testing** - Detection of bacterial endotoxins to confirm product safety.  
(USP <797> 12.3 | NAPRA 6.1.3)
- **Environmental Monitoring** - Routine monitoring of compounding areas.
- **BUD/Stability Studies** - Testing of potency, sterility, and stability to support evidence-based Beyond-Use Date (BUD) Assignments
- **Hazardous Drug Surface Wipe Testing and Kits** - Surface wipe testing to evaluate containment and cleaning effectiveness for hazardous drug safety  
(USP <800> | NAPRA Hazardous Drug Compounding Standards)

## What Our Testing Services Do for Your Business

- **Ensure Regulatory Compliance** – Meet the requirements of USP <797> and <800>, Health Canada, and other governing bodies—helping you avoid costly penalties or operational interruptions.
- **Extend your Beyond Use Date (BUD) with Stability Studies** – Stability testing, including potency, sterility, endotoxin, and other indicators, to provide objective data for informed, risk-based BUD assignments while maintaining quality and patient safety.
- **Protect Patient Safety and Product Integrity** – Detect microbial or particulate contamination early, preventing it from compromising sterile products and ensuring consistent quality and safety.
- **Support Root Cause Investigations** – Gain critical data to quickly identify sources of contamination, reduce downtime, and strengthen future contamination control.

## Saving you Time and Money

### Streamlined Efficiency

Partnering with us **reduces the time and resources required** for monitoring and testing allowing your team to focus on patient care and production.

### Cost-Effective Solutions:

We design **efficient, budget-conscious programs** tailored to your facility's specific needs and regulatory requirements.

### Trusted Expertise:

Our experienced microbiologists and quality specialists provide **reliable testing, insightful analysis, and peace of mind** that your compounding environment meets the highest standards.

## Other Services We Offer

- **Water** Testing
- **Stability** Services
- **Cosmetic** Testing
- **Method Development and Validation** Services
- **Microbiology Testing** Services
- **Natural Health Products (NHP)** Testing
- **Pharmaceutical & Drug** Development
